

GLÜKO-REP

Product description:

GLÜKO-REP is the newest member of *GLÜKO-GO* product family. **GLÜKO-REP** as a special supplementary feed, contains omega-3 fatty acids and dextrose in a rumen-stable form. The rumen-stable sugar of the product provides directly and gradually utilising energy source to the animals, and **n-3 (omega-3) fatty acids help reproductive biology processes.**

Benefits of feeding the product are:

- ▶ increasing percentage of fertility
- ▶ improve insemination index
- ▶ decreasing early embryo loss
- ▶ has positive effect on milk production
- ▶ increasing protein utilisation rate (lower urea levels)
- ▶ improves health status (e.g. lower somatic cell numbers)
- ▶ enhancing fat-free dry-matter content of milk

Indication of use:

The product is suggested to be fed in order to reduce effects negative energy status at the beginning of milk production and to improve **reproductive biology results.**

Suggested dosage:

- ▶ *Milking cows:* **300-400 g/animal/day**
(from beginning of transition till fertilisation)
- ▶ *Small ruminants:* **30-40 g/animal/day**
